12-inch class compact size and 15-inch class productivity

Chromebook x360 13c

Chromebook x360 13c is a Chromebook with 90.1% screen occupancy. Although it is 13.5 inches, the size of the main body is almost the same as the 12.3 inch Chromebook (compared to our company). Also, because it has a 3: 2 aspect ratio, it has a WUXGA + resolution (1920 x 1280) that has a wider display area by about 18% than the general full HD resolution (1920 x 1080), so it can be used for web applications used by many people. It is also ideal for tab browsing.

The average knowledge worker is said to be using 22 different web applications. These productivity increases because the vertical screen length is 15.6 inches, which is about the same as a laptop with a 16: 9 aspect ratio.

Aspect ratio 16: 9

Aspect ratio 3: 2

Safely access the latest data on the move or on the go.

All models of Chromebook x360 13c are equipped with 4G LTE compatible modules. You can access your data while you're on the move, on the subway, outdoors, or in places without Wi-Fi spots, without the hassle of setting up tethering with a smartphone that doesn't support instant tethering. In addition, LTE is effective when it is difficult to confirm whether the security measures required by the company or organization to which the public Wi-Fi spot or home Wi-Fi router belongs are met.

In addition, knowledge workers are said to have an average of three smart devices. Securely access the only and up-to-date data anytime, anywhere, and innovate in collaboration with teammates with diverse ideas.

Secure communication

Shut out visual hacking

Even if you can access data at all in a secure communication environment anytime, anywhere, you also need a peep measure called visual hacking.

The Chromebook x360 13c has a built-in reflective privacy screen HP Sure View (Gen4) on all models. By simply pressing the dedicated key to change the molecular structure of the LCD panel and discoloring the screen, visibility is suppressed to less than 1.5% at angles of 45 ° or more.

In addition, the 1000nit high-brightness display makes it ideal for teleworking at home or worcation at sightseeing spots, as it can be used in any environment, such as outdoors or indoors during the day.

Lightness alone is not mobility.

Mobility is not just thin and light. Data-backed reliability and ruggedness are the tools that empower people at the forefront. All models of the Chromebook x360 13c are equipped with a display that uses Corning® Gorilla® Glass 5™, which is also used in smartphones and has excellent scratch resistance, and is specified by the MIL-STD 810G established by the US Department of Defense¹⁹. It has undergone item tests and 300kgf pressurization tests. In addition, a robust hinge part* that has undergone a durability test of 25,000 times and a keyboard* that has a spill resistance function by coating with a grid-like coating are adopted as standard.

Equipped with USI pen compatible panel

* USI active pen is sold separately.

Handwriting , which is the most primitive means of communicating ideas to the other party, may be effective.

The HP Chromebook x360 13c is compatible with the USI (Universal Stylus Initiative) pen.

USI is a consortium for the standardization of active stylus, with members such as Wacom, Waltop, Synaptics, Intel, Samsung, Google, etc. (in no particular order).

The bidirectional communication protocol makes it less susceptible to peripheral noise and enables seamless drawing between devices from different manufacturers.

It is also possible to have a meeting with the other party with the corresponding memo app or whiteboard with a smooth feeling of 4096 tones .

It is also possible to use electronic signatures (digital signatures) that accompany the shift to paperless offices. The magnetic pen holder for the HP USI Active Pen (sold separately) allows you to instantly shape your ideas. Share your ideas with your peers now

with handwriting-enabled apps and services such as Google Keep and Jamboard .

Many people are doing multiple tasks at the same time, such as checking materials and creating minutes while having a video conference with colleagues and business partners .
 To do these things comfortably, you need the latest Intel® Core i5 or better performance with excellent multitasking .
 Powered by the latest Intel® Core™ processors, Chromebooks deliver the best performance for businesses, organizations and individuals alike, from education to business to entertainment and content creation .

Chromebooks with 10th generation Intel Core i5 10210U processors are faster than Chromebooks with Intel Celeron N4020 processors , both web and app, and are more productive. Please see the video for details.

It's okay for the whole family to be teleworking or learning online.

One of the family members started an online class during telework. Yet another started the game on his smartphone.

Many people have experienced screen freezes or audio breaks during a video conference.

Chromebook x360 13c is a Chromebook compatible with Intel® Wi-Fi 6 (GIG +). Achieves three times the speed compared to the previous generation.

You can upload large files in less than a minute, so you can start the next task immediately.

And the biggest evolution of Wi-Fi 6 is its four-fold higher capacity compared to its predecessor.

It is effective in a crowded state where the whole family connects to one access point at the same time.

About **3** times
the high speed ※4

With 1024QAM, which can send a lot of data at once, and a wide range of 160MHz channels, it provides a gigabit wireless LAN environment for homes and offices.

Approximately **4**

* 5

The OFDMA feature quadruples the average throughput for reliable and efficient connectivity on more devices. It is effective when the number of connected devices increases or the number of access points decreases in the future.

75 % low delay

* 6

OFDMA enhances the user experience for real-time applications such as video conferencing and streaming. (36ms → 7.6ms)

WPA3 ※7

Simultaneous Authentication (SAE) is used instead of the pre-shared key (PSK) exchange protocol used by WPA2. Disables the vulnerabilities found in WPA2. It also allows easy connection with a QR code. Maintains compatibility with WPA2.

Chromebook that enhances production and privacy are compatible.

Many people have inadvertently seen a privacy space in a video conference.

The HP Chromebook x360 13c has a camera kill switch.

The physical shutter switch closes the camera lens, so you don't have to rush to find the camera's off button on the video conference tool or stick a sticker anymore. Also, since it is equipped with a fingerprint authentication reader as standard, if you have trouble entering a password, you can unlock his Chromebook's lock screen as if you were using a smartphone by registering your fingerprint.

Also important in video conferences is audio quality.

Denmark The sound system jointly developed with the Danish audio maker "BANG & OLUFSEN" not only provides an experience such as a video conference with clear sound quality, but also allows you to enjoy watching high-quality video content.

HP Chromebook x360 13c is a Chromebook compatible with Google Play.

Gmail, Google Maps, YouTube, Google Photos, Google Drive, and other familiar apps that everyone uses are included from the beginning.

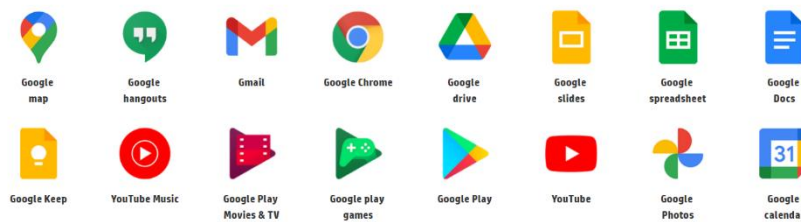

You can enjoy these apps on a 13.5-inch screen, which is much larger than your smartphone.

* The image is for the United States. It may differ from the actual product.

Familiar face, you can use it from the beginning

HP Chromebook x360 13c is a familiar service such as Gmail, Google Maps, YouTube, Google Drive, Google Photos, Google Docs as a document creation tool, Google Spreadsheet as a table calculation tool, Google Slides as a presentation tool, HangOut as a communication tool, etc. And tools are available from the beginning.

Easy to use

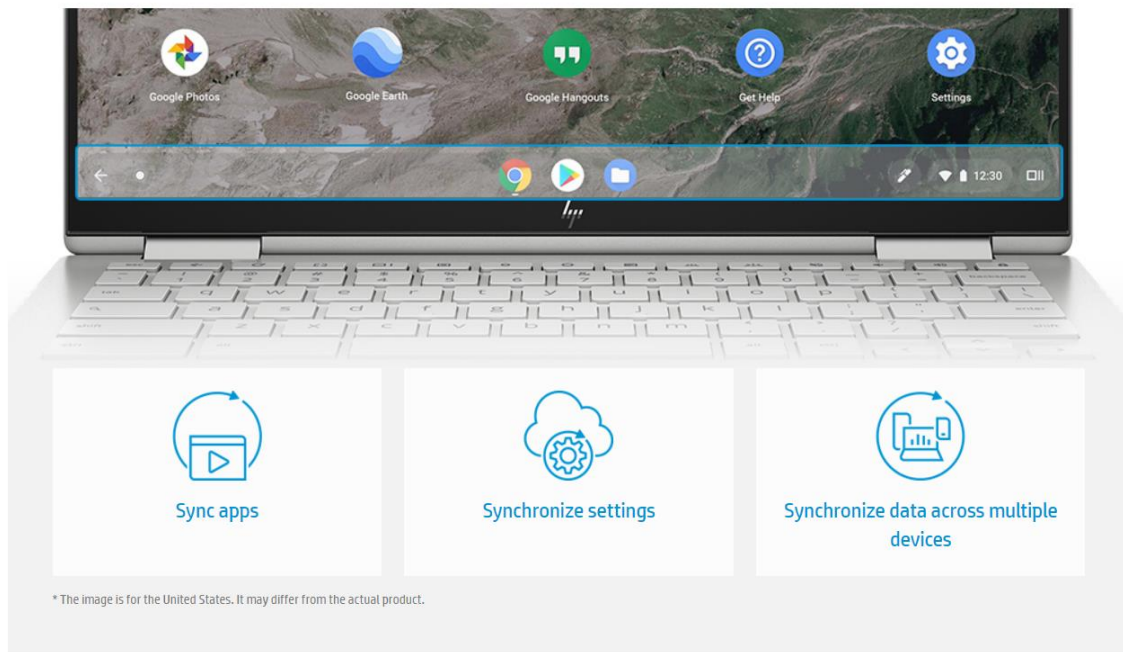

Simply log in to your Chromebook and launch the Google Play app on the shelf.

Do you have an Android smartphone or tablet?

You don't have to remember "what app did you put on your smartphone?"

Apps already installed on your smartphone will be synced to your Chromebook.

All you need is a Google account.

It starts faster than tying shoelaces.

Chromebooks are computers designed to help users do what they need to do online.

It will start within 10 seconds. Shall we compete with you?

The Chromebook will be waiting for your login before you finish tying the laces on both feet.

Is it troublesome to enter the password? The Chromebook x360 13c has a fingerprint reader so you can log in to your Chromebook without a password.

Of course, it's up to you to decide whether or not to do so.

Easy to set up

It's not just smartphone apps that sync.

If your smartphone's web browser is Chrome, registered bookmarks and site passwords will be automatically synchronized.

Plus, if you have multiple Chromebooks, the wallpaper, even the order of the apps on the shelves, will all sync.

You don't even have to remember, "What's that setting?"

It doesn't have to be your Chromebook.

No backup required. Because there is no data there

Unlike traditional computers, Chromebooks do not have a local hard disk drive, etc. * .

If you carry your data with you, you need to be careful about leakage and loss, and you will need to back up your data in case of data corruption.

Also, there are limited ways to share large amounts of data, which is not always efficient.

* Equipped with a built-in flash memory for saving apps.

Chromebook defense in depth

A Chromebook is a computer running Chrome OS designed for a secure online experience. Data can be accessed safely with defense in depth.

Automatic updating

Chrome OS will always automatically update to the latest and safest version.

Since it is executed in the background without the user being aware of it, nothing can be done during the update.

Sandbox structure

Even if you visit a malicious site, it will only crash in the smallest unit called a tab.

Minimize impact on other tabs, apps, Chrome OS, Chromebooks.

Confirmed boot

If a third party makes a system change, the Chromebook will automatically detect it at boot time and boot into the previously safely booted system.

Encrypted internal flash memory

Even if the Chromebook is stolen, the built-in flash memory is encrypted with AES128 / 256, so it is extremely difficult to decrypt and read downloaded files, cookies, and browser cache files.

The encryption key is also different for each account.

Long time battery
You may forget the existence of the AC adapter.

Chromebooks work without a network.
You don't have to have Wi-Fi.

* The product is an image. The actual product and ports are different.

Chromebooks can't always say that they can't do anything without a network connection.

You can also write emails, read purchased books, and enjoy games on the plane.

The Chromebook x360 13c also supports instant tethering.

If you have a model or contract that supports instant tethering, you can tether with one touch.

Offline mode

You can enjoy it without Wi-Fi.

Instant tethering

Easy to use.

While online, open the document you want to work with offline.

"Take offline" from the file menu is OK.

Any edits made during that time will be synced when you connect to the network.

You can share one Chromebook with your family.

While you're browsing the web on your smartphone or tablet, your family may want to watch a Netflix drama or play a game.

Chromebook is fine. If you log out and then take over, your apps, data, bookmarks, history, etc. will not be seen by third parties.

That's because if you log in to your Chromebook with each individual's Google account, your Chromebook will sync apps, data, bookmarks, and all your data as if it were your individual's Chromebook.
