

Features of this product

Chromebook for home, school, or work

Chromebook 14a is a touch screen compatible Chromebook.

Familiar Android apps and games can be enjoyed with a high resolution (1920 x 1080 pixels) diagonal 14.0 inch powerful full HD high resolution screen, and with a pinch or swipe like a familiar smartphone. I can do it.

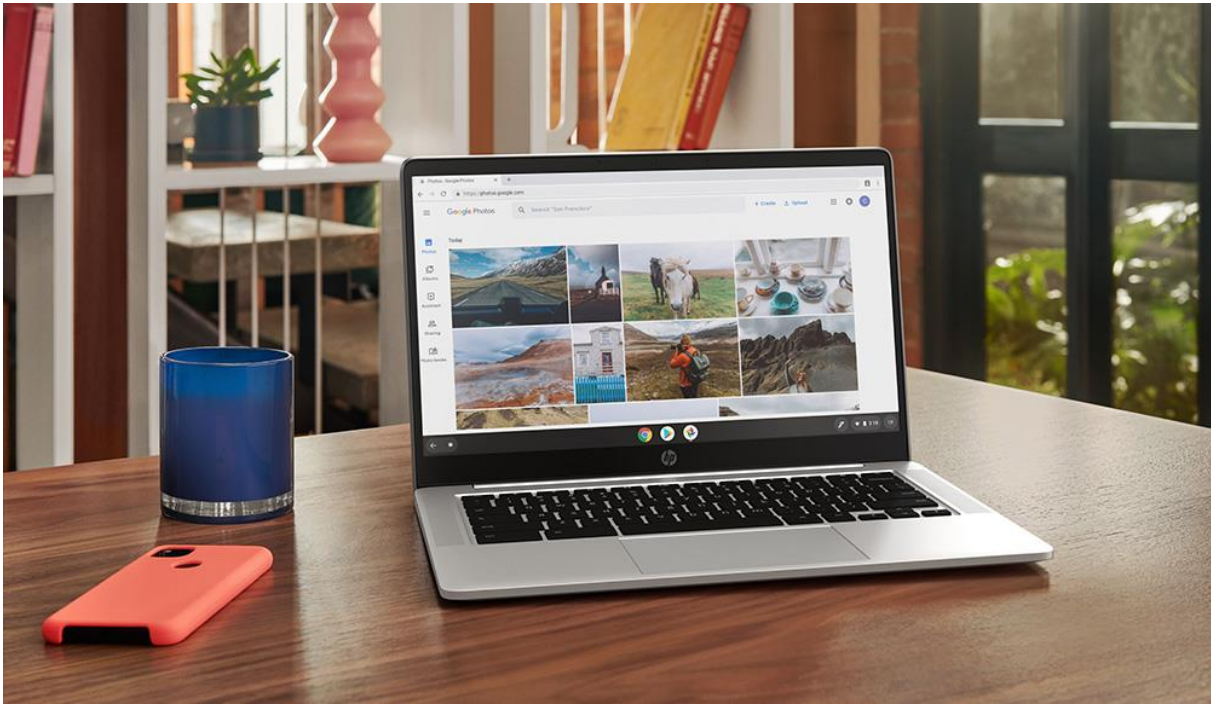

Mouse settings are also easy.

All you need is a Bluetooth mouse (sold separately). Open the Settings app and press the Bluetooth mark. All you have to do is auto-search his Bluetooth mouse in pairing mode and enter the displayed pairing key.

Of course, the Chromebook 14a also has a USB Type A interface, so if you have a USB mouse (sold separately), you can use it just by connecting it. ·

* Except when a driver for Windows / Mac OS is required separately.

I'll show you if you can. It doesn't have to be innovation.

Presentations created with Google Slides, YouTube videos, NetFlix dramas, and Spotify music can be projected on a Chromecast-connected TV.

With a Chromebook and Chromecast, you can enjoy it in your own room, or with family and friends in the living room.

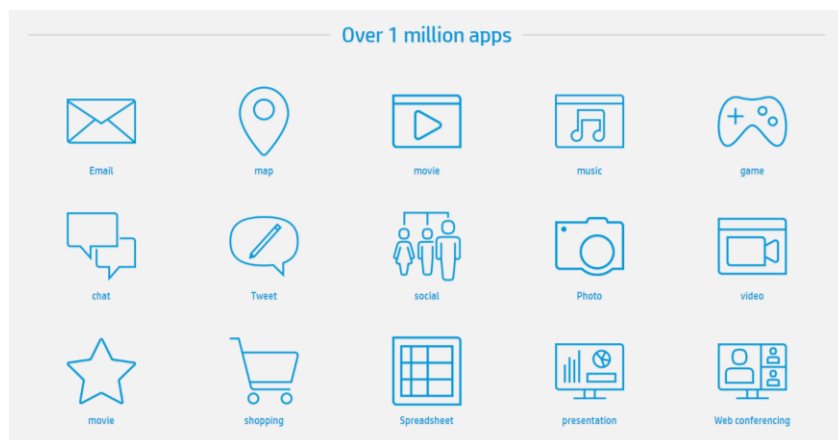

Features of Chromebook

Get it on Google Play

HP Chromebook 14a is a Chromebook compatible with Google Play. You can use all the familiar apps you use from the beginning, such as Gmail, Google Maps, YouTube and Google Photos. You can enjoy these apps on a 14.0-inch screen, which is much larger than your smartphone.

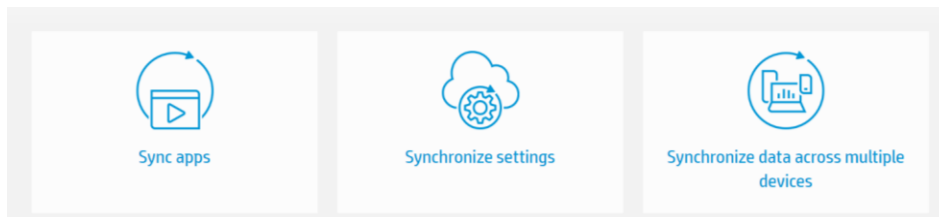

Easy to use

Simply log in to your Chromebook and launch the Google Play app on the shelf.
Do you have an Android smartphone or tablet?

You don't have to remember "what app did you put in your smartphone?"
Apps that are already installed on your smartphone will be listed on Google Play on your Chromebook.

All you need is a Google account.

It starts faster than tying shoelaces.

Chromebooks are computers designed to help users do what they need to do online.

It will start within 10 seconds. Shall we compete with you?

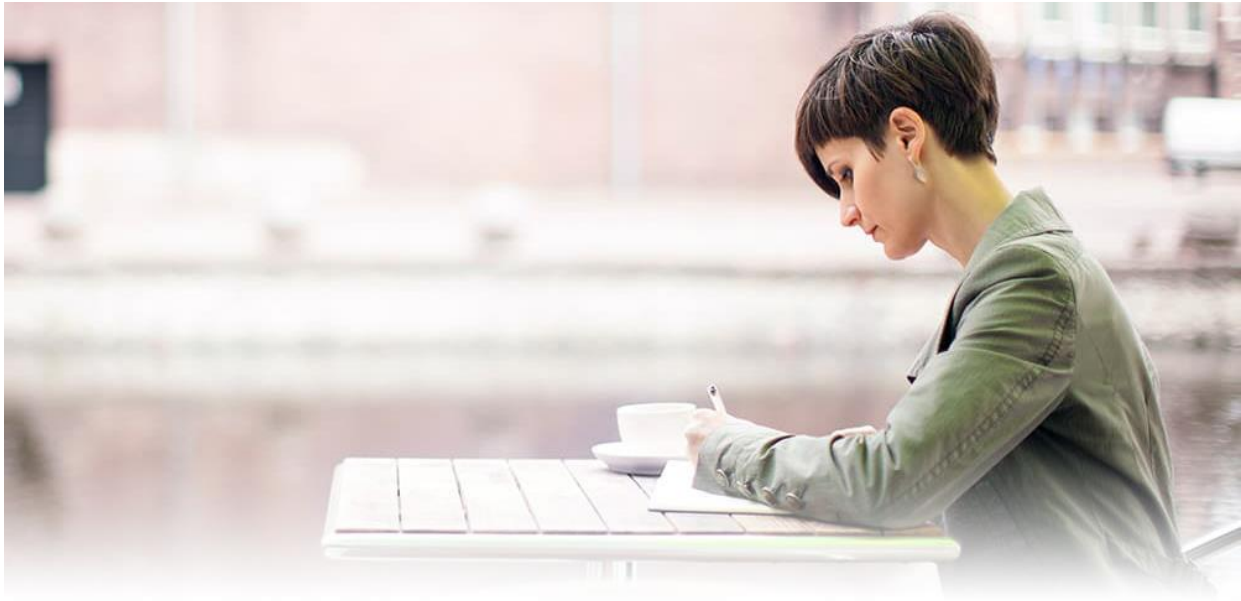

The Chromebook will be waiting for your login before you finish tying the laces on both feet.

Is it troublesome to enter the password? If you have a compatible Android smartphone near your Chromebook, you can log in to your Chromebook without a password.

Of course it's up to you to decide whether or not to do so.

---	--	--

You may forget the existence of the AC adapter.

Chromebooks are computers designed to help users comfortably do what they need to do online.

It runs on Chrome OS, which is based on Google Chrome, the most used web browser on all smart devices (computers, tablets, smartphones) around the world . The simple structure allows the battery to last for a long time.

No antivirus software required

There is no notification of updates to antivirus software.

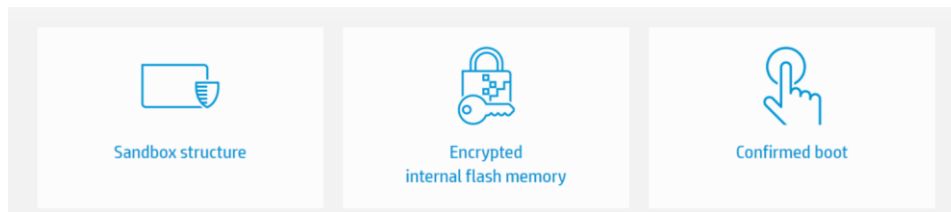

A Chromebook is a computer running Chrome OS designed for a secure online experience.

Chrome OS is always automatically updated in the background with the latest and safe version every 6 weeks.

With a function called a sandbox, even if you visit a malicious site, it will only crash in the smallest unit called a tab. It does not affect other tabs or apps.

In addition, the built-in flash memory is encrypted with AES128 / 256. Even if a malicious person takes out the flash memory, it is extremely difficult to combine it. The encryption key is also different for each account.

In addition, the Confirmed Boot feature automatically detects system changes by third parties and boots into the previously safely booted system.

Google family link

* The product photo is an image. It may differ from the actual product.

Many Google Play Store apps are available for Chromebooks.
You can comfortably enjoy videos, games, SNS, shopping, etc. on a screen much larger than a smartphone.

However, there is sound support from parents for the use of children under the age of 18 , such as the use of services that require credit card payments and the use of electronic devices for long periods of time that may be harmful to health. Is required.

If you install the Family Link app on your parent's smartphone (Android or iOS), you can set the maximum daily usage time and rest time of your child's Chromebook from your parent's smartphone.

You can also notify your parent 's smartphone of the content of the app your child tried to download on your Chromebook, access to websites that aren't suitable for your child, or a request to extend your daily usage limit.

The person can approve the contents after confirming them on the smartphone.
